## **DETAILED ACTION**

- 1. Applicant's amendment filed on March 14,2005 was fully considered and entered.
- 2. Claims 2-24 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

Independent Claim 22, is allowable over Prior Art of Record since the cited references taken alone or in combination, in particular Ikeda et al. (US 2001/0048568 A1), Bonyhard (US 5,991,104), Mallary (US 6,813,106 B1), do not teach or suggest "an intensity of the magnetic field within the depression being variable in response to a change of position in a radial direction of the magnetic disk."

Independent Claim 8, is allowable over Prior Art of Record, since the cited references taken alone or in combination, in particular Ikeda et al. (US 2001/0048568 A1), Bonyhard (US 5,991,104), Mallary (US 6,813,106 B1), "an intensity adjusting mechanism designed to generate a displacement of the magnet in a of the magnetic disk in response to a vertical direction perpendicular to a surface displacement of the magnet in the radial direction of the magnetic disk".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/633,758

Art Unit: 2651

## Conclusion

Page 3

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Ikeda et al. (US 2001/0048568 A1), discloses a method for forming a magnetic pattern in a magnetic recording medium, method for producing a magnetic recording medium, magnetic pattern forming device, magnetic recording medium and magnetic recording device.
- Bonyhard (US 5,991,104), discloses using servowriter medium for quickly written servopattern on magnetic media.
- Mallary (US 6,813,106 B1), discloses a premagnetization process for printing longitudinal media.
- Takano (US 6,813,105 B2) discloses a magnetic transfer apparatus for transferring data to perpendicular magnetic recording medium and method of magnetic transfer.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dismery E. Mercedes whose telephone number is 571-272-7558. The examiner can normally be reached on Monday - Friday, from 9:00am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Hudspeth can be reached on 571-272-7843. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
